NOTICE TO MARINERS.
No. 77 (SPECIAL).
CHINA SEA.
FOOCHOW DISTRICT.

Haitan Strait—Range Beacons established.

NOTICE is hereby given that two Range Beacons have been established on the north-eastern slope of Pass Island, indicating a bearing of N. 20° W., to guide vessels through the narrow channel; each beacon having a diamond-shaped top mark—the northern one with a white field and the central portion black, and the southern one with a black field and the central portion white.

Also that two Range Beacons have been established on the south-eastern slope of Slat Island with the summit of the island in one with the Fort bearing from it W. by N. 1/2 N., and then haul out to sea to pass about 3 cables to the eastward of Black Rocks. The least depth found with the beacons in line was 15 feet at Low Water of the lowest Spring tides—about half way between the north side of Middle Island and with Town Point, and the last bearing given above.

Each of these beacons has a triangular top mark painted white with a vertical black stripe in the middle—the triangle on the northern one being inverted.

According to soundings obtained during the present month, a vessel bound to the northward should keep the beacons on Pass Island in line from the time when Quoin Hill is on with Tye Yung Shan Peak, bearing about W. 1/2 S., till the southern end of the middle one of the Rocky Islands is on with the Fort bearing from it W. by N. 1/2 N., and then haul out to sea to pass about 3 cables to the eastward of Black Rocks. The least depth found with the beacons in line was 15 feet at Low Water of the lowest Spring tides—about half way between the north side of Middle Island and with Town Point, and the last bearing given above.

The Beacons on Slat Island, if brought in line when Inner Rock bears East and kept so till Inner Rock bears West, will lead well clear of all known dangers.

All bearings given are magnetic.
